

Saving Memories -- June News

One of the best ways to **save memories** is to frame them so that they are easy to view and to share with others. It also keeps them safe from harm using acid free materials and putting them behind glass so they can't be torn, chewed or thrown out by mistake.

This piece is comprised of important pages from the program booklet of a play in which my friend's son acted. We chose a soft colored, acid free mat with holes cut to fit the different sections. Then we added a frame to match the others in his collection.

This is also a great way to save **graduation or wedding** invitations with pictures and objects.

“Have frames, will travel” is my slogan and it means I will visit you for a free framing consultation and free delivery when your frame work is done. I am happy to come to your house, your office or another location of your choosing. It is very helpful to select framing materials in the area where the picture will be hanging since it is easy to hold samples up for comparison.
